EDUCATION

Corvinus University of Budapest **Aug. 2025 – Expected: June 2028**
BBA, Business Administration and Management *Budapest, Hungary*

Dokuz Eylül University **Oct. 2022 – June 2025**
Undergraduate Coursework, Computer Engineering *İzmir, Türkiye*

WORK EXPERIENCE

ziyasharifli.dev **Aug. 2026 – Present**
Mobile and Web Developer *Budapest, Hungary*

- Independent developer designing, building and releasing apps for Android, iOS, macOS and the web (see Software Projects).
- Own each product end to end: product design, development, automated releases with GitHub Actions, and self-hosted backends.

SOFTWARE PROJECTS

Vectra *Kotlin Multiplatform · React · Go*

- Made for Corvinus students like me. Instead of checking Neptun, the BKK app and the weather one by one, you open one app.
- It pulls in your timetable, shows which buses and trams are coming, and keeps track of your attendance for each course. Works on Android, iPhone and the web.

Droidtosh *Swift · Kotlin · Go*

- An iPhone just works with a Mac. An Android phone doesn't, so I built the missing piece: notifications, calls, copy and paste, and file sharing between the two.
- No account needed, and only your own devices can read what goes between them.

Volum *Kotlin Multiplatform*

- A workout log that remembers what you lifted last time, so most sets take one tap instead of typing the same numbers again.
- You can train with a friend and follow each other's workouts live, and it still works in a gym with no signal.

Kaloria *Kotlin · Jetpack Compose*

- A calorie tracker that doesn't guess. Scan the label or the barcode and it logs exactly that.

SKILLS & LANGUAGES

- **Mobile:** Kotlin; Swift; Compose Multiplatform; Jetpack Compose; SwiftUI; Ktor; Room; CameraX + ML Kit
- **Web:** TypeScript; React; SvelteKit; Tailwind CSS; Vite; TanStack Query; Progressive Web Apps
- **Backend & DevOps:** Go; PocketBase; Docker; SwiftNIO; GitHub Actions (CI/CD); Playwright; Vitest
- **AI:** AI-assisted development; agentic coding workflows; prompt engineering
- **Skills:** Corporate Finance; Financial Accounting; Project Management; Product Management; UI/UX Design; Brand Identity Design
- **Languages:** Azerbaijani (Native); Turkish (Native); English (Native or Bilingual); Russian (Limited Working)
